

RIVERINA

WAGYU CALF CREEP CRUMBLES

PRODUCT DESCRIPTION

RIVERINA WAGYU CALF CREEP CRUMBLES are a palatable, high protein and energy supplement with added vitamins and minerals for very early weaning or creep feeding wagyu beef calves less than 100kg liveweight.

During times of feed shortage lactating beef cows can have substantial body weight losses if calves remain on the cow. This leads to poor cow condition and subsequent low conception rates, especially in first calf heifers together with slower growth rates in the calves. In extreme feed shortages WAGYU CALF CREEP CRUMBLES can be used to wean calves from six weeks of age.

TYPICAL COMPOSITION

- Barley, maize, wheat, millrun, soybean meal, canola meal, molasses, buffers, organic zinc, vegetable oil, di-calcium phosphate, limestone, urea, mycotoxin binder, mould inhibitor, Rumensin®, Flaveco™, salt and Riverina ruminant vitamin & mineral premix.
- Base raw materials may gradually change seasonally.

DIRECTIONS FOR USE

- THIS IS NOT A COMPLETE FEED.** It is designed to be fed with a roughage source such as pasture, hay or silage. WAGYU CALF CREEP CRUMBLES can be used for:
- CREEP FEEDING ON PASTURE:** Feed ad lib in a self-feeder while on the cow in a creep feeding yard. DO NOT allow cow's access to the feeder. Calves will receive enough roughage while grazing with the cow.
- EARLY WEANING IN YARDS:** Calves under 100kg (5-14 weeks) – Initially feed the WAGYU CALF CREEP CRUMBLES in troughs.
 - Week 1 - Offer 0.25–0.5kg/head/day in trough
 - Feeding rates can be increased by 0.25kg/head/day when the calves are leaving the troughs empty.
 - Keep feeding this product till the calves reach 100kg and are consuming at least 1.0kg/head/day of crumbles.
 - Remove stale feed from the troughs daily.
 - Good quality leafy hay must be available at all times eg oaten, grassy lucerne or irrigated rhodes grass hay.
 - Feed should be available at all times.
 - Calves should always have access to cool, clean, fresh water at all times.
 - Water troughs should be cleaned a minimum of once a day to improve feed intakes.
 - When calves reach 100kg change to the WAGYU CALF WEANER PELLETS.
- Contact your local Riverina representative for more advice on early weaning wagyu cattle.

FEATURES

- WAGYU CALF CREEP CRUMBLES use quality proteins from soybean meal and canola meal to help ensure the young calves grow muscle.
- Organic zinc (ZinMet®) helps develop sound hooves.
- Added Vitamin E helps support immune development.

QUALITY PRODUCT

- Manufactured to strict quality control standards for incoming raw materials and the finished product.
- Formulated in accordance with current research into cattle nutrition.

MEDICATION

This feed contains Rumensin® which supplies monensin sodium at 25.0mg/kg for improved feed conversion efficiency and Flaveco™ which supplies flavophospholipol at 10mg/kg for stimulating growth rate and increasing feed efficiency

WITHHOLDING PERIOD

Nil.

WARNING

Should be gradually introduced to allow for proper rumen adaption.
Do not feed to dogs, horses or other equines as it may prove fatal.
Feed only to beef calves.
Do not feed to sheep or lambs.

STORAGE

Cool, shaded, dry conditions away from vermin.

EXPIRY

Six months from the date of manufacture.

PACK SIZE

20kg woven polypropylene bags.
Bulk: Please contact your Riverina sales representative.

Rumensin® is a registered trademark of Eli Lilly and Company.
Flaveco™ is a registered trademark of International Animal Health P/L.
ZinMet® is a registered trademark of Global Animal Products Inc.

This feed is scientifically formulated for the intended species of animal and should not be fed to any other animal. It may contain medication and ingredients that may prove harmful if fed to other species.

Ver: 7.3

Issue Date: March 2024
