

RIVERINA

WAGYU CALF GROWER PELLETS

PRODUCT DESCRIPTION

RIVERINA WAGYU CALF GROWER PELLETS are a palatable, protein and energy supplement with added vitamins and minerals for growing wagyu calves for early weaning or creep feeding wagyu calves greater than 200kg liveweight.

TYPICAL COMPOSITION

- Barley, maize, wheat, millrun, soybean meal, canola meal, molasses, buffers, organic zinc, vegetable oil, di-calcium phosphate, limestone, urea, mycotoxin binder, mould inhibitor, Rumensin®, Flaveco™, salt and Riverina ruminant vitamin & mineral premix.
- Base raw materials may gradually change seasonally.

- THIS IS NOT A COMPLETE FEED.** It is designed to be fed with a roughage source such as pasture, hay or silage. WAGYU CALF GROWER PELLETS can be used for:
 - CREEP FEEDING ON PASTURE:** Feed ad lib in a self-feeder while on the cow in a creep feeding yard. DO NOT allow cows access to the feeder. Calves will receive enough roughage while grazing with the cow.
 - EARLY WEANING IN YARDS:**
 - Initially feed the WAGYU CALF GROWER PELLETS in troughs.
 - Week 1** - Offer 0.5kg/head/day in troughs.
 - Feeding rates can be increased by 0.25kg/head/day when the calves are leaving the troughs empty.
 - Week 2** - Offer 1kg/head/day of the WAGYU CALF GROWER PELLETS and any other dry licks or supplements that will be used after weaning.
 - Remove stale feed from the troughs daily.
 - Good quality leafy hay must be available at all times eg oats, grassy lucerne or irrigated rhodes grass hay.
 - Feed should be available at all times.
 - Water troughs should be cleaned a minimum of once a day when in the yards to improve feed intakes.
 - After weaning calves can be turned out onto pasture with a self-feeder. The slides adjusted down to restrict intakes to achieve the desired rate of gain.
 - Feed at 0.5 – 1.5% body weight after weaning.
 - The target should be to achieve an average of 0.7kg/head/day to achieve a liveweight of 280kg at 12 months of age.
 - Calves should always have access to fresh, cool, clean water at all times.
 - Contact your local Riverina representative for more advice on weaning wagyu cattle.

| NUTRITIONAL ANALYSIS | | | As Fed | Dry Matter |
|----------------------|---|------|--------|------------|
| DRY MATTER | % | : | 89.00 | 100.00 |

FEATURES

- WAGYU CALF GROWER PELLETS uses quality proteins from soybean meal and canola meal to help ensure the young calves grow muscle.
- Organic zinc (ZinMet®) helps develop sound hooves.
- Added Vitamin E to help support immune development.

QUALITY PRODUCT

- Manufactured to strict quality control standards for incoming raw materials and the finished product.
- Formulated in accordance with current research into cattle nutrition.

MEDICATION

This feed contains Rumensin® which supplies monensin sodium at 25.0mg/kg for improved feed conversion efficiency and Flaveco™ which supplies flavophospholipol at 10mg/kg for stimulating growth rate and increasing feed efficiency

WITHHOLDING PERIOD

Nil.

WARNING

Should be gradually introduced to allow for proper rumen adaption.
Do not feed to dogs, horses or other equines as it may prove fatal.
Feed only to beef calves.
Do not feed to sheep or lambs.

STORAGE

Cool, shaded, dry conditions away from vermin.

EXPIRY

Six months from the date of manufacture.

PACK SIZE

20kg woven polypropylene bags.
Bulk: Please contact your Riverina sales representative.

Rumensin® is a registered trademark of Eli Lilly and Company.
Flaveco™ is a registered trademark of International Animal Health P/L.
ZinMet® is a registered trademark of Global Animal Products Inc.

This feed is scientifically formulated for the intended species of animal and should not be fed to any other animal. It may contain medication and ingredients that may prove harmful if fed to other species.
Ver: 7.3

Issue Date: March 2024
