

RIVERINA

ADVANCE® 30 BYPASS PELLETS

PRODUCT DESCRIPTION

RIVERINA ADVANCE® 30 BYPASS PELLETS is a supplementary feed for Sheep and Cattle in times of poor quality pasture or diminishing pasture supply. It must be fed with roughage (hay and or pasture).

TYPICAL COMPOSITION

- Cottonseed meal, soybean meal, canola meal, sunflower meal, cereal grains, millrun, urea, molasses, vegetable oil, limestone, dicalcium phosphate, buffer, Bovatec®, salt, mould inhibitor, Riverina ruminant vitamin & mineral premix.
- Base raw materials may gradually change seasonally.

DIRECTIONS FOR USE

- **THIS IS NOT A COMPLETE FEED.** Cattle should be consuming at least 2% of body weight daily in dry matter from pasture and/or silage/hay.
- Feed in troughs, self-feeders or as part of a total mixed ration.
- RIVERINA ADVANCE® 30 BYPASS PELLETS is used to balance cattle & sheep diets when there is an abundant supply of low protein pasture. The feeding rates are low because of the high protein content of the pellet.
- Beef Cattle & Sheep – When pasture quality is low this is a safe option to boost protein intake.
- Dairy Cattle - Can be used to complement bail feeding to lift the intake of bypass protein and minerals to high producing dairy cows or help balance a TMR diet.
- Dairy Heifers & Dry Cows - It is suitable for dairy replacement heifers grazing lower quality pastures to ensure optimal growth or for dry cows in low body condition. (In the last 4 weeks prior to calving RIVERINA MILK MAKER SPRINGER PELLETS are recommended).
- Below are the suggested feeding rates for RIVERINA ADVANCE® 30 BYPASS PELLETS. The level of feeding will be determined by pasture quality and animal condition.
- Clean water needs to be available at all times.

Animal Type	Approximate Feeding Rate
Sheep	Up to 0.25kg per day
Cattle-weaners, Heifers	Up to 1.0 kg per day
Cattle-steers, Dairy Dry Cows	Up to 1.5 kg per day
Beef Cows with Calves	Up to 2.0 kg per day
Lactating cows	Consult your Riverina nutritionist for advice.

- Consult your Riverina Representative for assistance to achieve the most cost effective option for your farm when using ADVANCE® 30 BYPASS PELLETS.

MANGANESE	mg/kg	:	160.00
SELENIUM	mg/kg	:	0.40
ZINC	mg/kg	:	160.00

FEATURES

- A low grain and low urea diet that is safe to feed.
- RIVERINA ADVANCE® 30 BYPASS PELLETS consist of by-pass protein, a small amount of urea to supply some readily available nitrogen to the rumen microbes and balanced levels of calcium, phosphorus, vitamins and minerals.
- The high protein helps stimulate the rumen microbes and will help encourage cattle to graze pastures more efficiently.
- Compared to using a straight protein meal these pellets also contain balanced vitamins and trace minerals.
- No added copper, so safe to feed to sheep.

QUALITY PRODUCT

- Manufactured to strict quality control standards for incoming raw materials and the finished product.
- Formulated in accordance with current research into ruminant nutrition and mixed using a variety of quality raw materials.

MEDICATION

This feed contains Bovatec® which supplies Lasolcid at 60 mg/kg.

WITHOLDING PERIOD

Cattle: Meat - Nil.
Milk - Nil.
Sheep: Meat - Nil.
Milk - See WARNING below.

WARNING

Do not feed to horses or other equines as it may prove fatal.
Do not feed to lactating ewes where the milk or milk products may be used for human consumption.
Feed only to sheep and cattle.

STORAGE

[Cool, shaded, dry conditions, away from vermin.](#)

EXPIRY

[Six months from the date of manufacture.](#)

PACK SIZE

20kg woven polypropylene bags.
Bulk: Please contact your Riverina Sales Representative.
