

# PASTUREPRO® TEN + RUMENSIN®

## Supplement For Cattle Grazing Mature Pasture

### Product Description

**RIVERINA PASTUREPRO® TEN + RUMENSIN®** is a high protein, vitamin and mineral supplement designed to be fed to cattle grazing mature pasture. This product **MUST** be fed with abundant pasture.

### Typical Composition

- Protein meals, urea, vegetable oil, phosphate, ammonium sulphate, Rumensin®, limestone, bentonite, mould inhibitor, salt, organic selenium ruminant vitamin & mineral premix.
- Base raw materials may gradually change seasonally.

### Directions For Use

- **THIS IS NOT A COMPLETE FEED**, it is designed as a supplement to be fed to cattle on pasture.

### Recommended Intake

ADULT CATTLE: 200g/head/day

WEANER CATTLE: 120g/head/day

- Pasture quality, animal mineral status and condition will influence the level of intake.
- Pasture must be in abundant supply and cattle should have access to a reliable supply of clean water at all times.
- Start supplementation before cattle start losing weight.

### Feeding:

- Initially feed salt or **PASTUREPRO® CALPHOS**, in troughs to the cattle. Continue until the intakes drop to 150g/head/day or less.
- Then provide **PASTUREPRO® TEN + RUMENSIN®** to the cattle in well drained or open ended troughs or half drums.
- Troughs should initially be placed a minimum of 200m from watering points.
- After several days, move the troughs away from the water points. This will reduce intakes and encourage stock to graze the paddocks.
- Do not allow troughs to be emptied. This can lead to urea toxicity as cattle can over-consume when the troughs are refilled.
- To help boost breeding performance, feed 6-8 weeks prior to mating.
- Do not feed with any other urea sources, such as liquid supplements, pellets, blocks etc.
- Monitor intakes when starting cattle to avoid excessive intakes of urea.
- Protect feeding points from wet weather.
- Read "Advice and Warnings for Feeding Dry Supplements" on the Riverina website.

### DISCONTINUE FEEDING IF INTAKES EXCEED:

- ADULT CATTLE: 400g/head/day
- WEANER CATTLE: 250g/head/day

**Contact your local Riverina Representative for more detailed information.**

### Nutritional Analysis

Dry Matter	95	%
Protein (min)	49	%
Equiv. CP (min)	36	%
Urea	10	%
Calcium (min)	5	%
Phosphorus (min)	2.5	%
Sulphur	1.6	%
Salt	20	%
Vitamin A	58,000	IU/kg
Vitamin D3	7,000	IU/kg
Vitamin E	220	mg/kg
Iron	625	mg/kg
Iodine	6.25	mg/kg
Cobalt	6.25	mg/kg
Copper	150	mg/kg
Manganese	500	mg/kg
Selenium	2.5	mg/kg
Zinc	500	mg/kg

Nutritional levels are on an as fed basis.

### Features

- **PASTUREPRO® TEN + RUMENSIN®** has a combination of bypass protein and non protein nitrogen to balance low protein levels in pastures, to help improve pasture digestion. .
- Helps to reduce live weight losses on dry pastures.
- Added trace minerals and vitamins help growing and breeding performance.

### Quality Product

- Manufactured to strict quality control standards for incoming raw materials and the finished product.
- Formulated in accordance with current research into cattle nutrition.

### Medication

- This feed contains Rumensin® which supplies Monensin Sodium at 250mg/kg on an 'as fed' basis for improved weight gain and feed efficiency.

### Withholding Period

Nil.

### Warning

- Urea can kill cattle if consumed too quickly.
- Keep dry at all times.
- Do not feed this supplement to starving, thirsty or salt deficient stock.
- Do not feed to dogs, horses or other equines as it may prove fatal.
- Feed only to cattle.
- Do not feed to sheep.

### Storage

Cool, shaded dry conditions, away from vermin.

### Pack Size

20kg bags.
